YOUR PARTNER IN DOCUMENT
AND INFORMATION MANAGEMENT

Digital Image to Archive Film Conversions

Do you need to meet government standards for long-term storage?

Do you have digital documents you must maintain for many years such as:

- Insurance Policies
- Court Records
- Mortgage Files
- Pension files
- Law Enforcement Records
- Patient files

Using the latest equipment, GSI can convert your digital images to film so that you can safely archive your documents. Whether your original documents were scanned from paper or were created within an application, the Kodak Document Archive Writer that GSI utilizes can handle them. The advanced technology available with the Archive Writer can clean up images, de-skew images and adjust the density to ensure the highest quality film record.

Whether your driver is a legal mandate or the need for critical records in your business to be preserved for decades, **GSI can meet your requirements.** We can produce indexed copies of your digital data on media that can be read for hundreds of years. This type of storage protects your long-term storage records from the continually changing technology and can help prepare you for a solid disaster recovery plan.

You can:

- Easily convert digital images to microfilm
- Get permanent storage that will be readable by humans for hundreds of years
- Meet government standards for storage
- Meet your own internal standards for long-term document storage
- Get easy access to the stored records via a Preservation Index and logical 4 groupings of files
- Get high quality microfilm storage specifically optimized for capturing digital images
- Get prepared for a complete disaster recovery plan
